

CONSTRUCTIVE MEDIA can generate architectural illustrations for use in pre-construction plans, off-the-plan developments or council submissions.

3D VISUALISATIONS can be created at all phases of construction. Animation can be created for larger projects to provide a more intimate view of the proposed development.

ABOUT CONSTRUCTIVE MEDIA

Formed in 2003, Constructive Media is a local business dedicated to providing a personalised service to all of its clients.

Whether it is an intimate residence or commercial tower, Constructive Media offers assistance with every aspect of the design process, including presenting pre-construction visuals to council.

Years of experience in the housing market means Constructive Media is practised at working closely with designers and architects to resolve planning issues.

Another dimension

Constructive Media's expertise in visualising plans is bringing dreams to life.

As a local, multi-faceted business specialising in the property market, Constructive Media can help make plans a reality.

The company has a highly skilled team who is qualified in a variety of fields including architectural illustrations, 3D visualisations, animation and web design. Cutting-edge technology and dedicated hardware ensure the final product is of the highest quality.

Specialising in creating 3D models that allow clients to get a more accurate understanding of the design, Constructive Media liaises closely with designers and

architects to help resolve any council or planning issues. This way, projects are finished faster with minimal angst for the client.

With on-line quote requests available and a comprehensive media archive, clients have easy access to their projects.

All work is carried out directly from Constructive Media's Perth office, with nothing outsourced overseas or interstate, which means clients can expect a personalised service and take advantage of the team's local knowledge.
